

Market Release Note

MRN-TS0869-002

Product number: TS0869

Product description: Four-Lift Controller– Firmware Upgrade

Product version: L-110613.803

Affected parts: TS0869, TS0869B, TS0869S

Release date: 30 July 2013

Important message

When upgrading from an earlier version of firmware the lift controller will default to factory settings and require reprogramming. We recommend that you backup the programming before upgrading.

New features

Compatible with Challenger10. The Four-Lift controller can be used with either Challenger10 panels or Challenger V8 panels.

Soft time zones can be assigned to floors (Challenger10 only). Both soft and hard time zones can be assigned to the Four-Lift controller's floors when used on a Challenger10 system.

Hard default via keypad. The RAS menu option 3. "Initialize database" removes the need to short the "super cap" on the Four-Lift controller PCB to default the controller.

Issues resolved in this release

Issue	Details
Improved macro logic handling.	Macro logic handling inside the lift controller has now been improved.
