

## Market Release Note

MRN-TS1020-002

---

Product number: TS1020 & TS1020B

Product description: Analogue DGP

Product version: V01-02.5170

Affected parts: TS1020, TS1020B

Release date: 25 August 2014

Interlogix is pleased to announce the release of new Analogue DGP firmware.

Please visit the website at [www.interlogix.com.au/downloads](http://www.interlogix.com.au/downloads) to download the latest firmware version.

## Important message

When upgrading firmware on the DGP the database will be preserved, however we recommend that you take note of the programming before undertaking the upgrade.

## New features

### Expansion module type selection

TS1020 (Analogue DGP) can now be used with both the TS0021 (expansion modules) and the TS1021 (Eight-input expansion module) by selecting which modules are connected to it through a keypad. EOL values 1K0, 1K5 & 2K0 are not supported on the TS0021.

## Resolved Issues:

The DGP used to report CPU restart messages before shutdown. This issue only occurred if 16 relays were connected and all were active when the DGP was shutting down due to low voltage.

## Known Issues

No known issues.
